SUPPORT | ENABLEMENT | INDEPENDENCE

Supporting and encouraging people to move forward with their lives and to be independent is at the heart of what we do.

Eden Futures has been providing services to people with support needs for over 20 years. We have developed an excellent reputation by providing person-centred packages of care to meet the needs of over 500 service users.

Person-centred support

We are committed to supporting people to live full and independent lives in their communities. Our focus is to enable people to fulfil their potential, make positive choices and to have control over their lives and futures. We encourage and support people to use their local services and mainstream facilities and to feel part of their local community.

Finding a place to live

Many people who receive our support also require a home. We work in partnership with many different types of housing agents and we have an experienced property team who will source a place to live that suits individual needs and is in a desired location. The breadth and flexibility of our services means that we can continue to support our service users as their aspirations or needs change.

Care pathway

We develop services around the individual at all stages of their care pathway, from Supported Living and Outreach Support, to support under the Mental Health Act and Community Treatment Orders.

Working together
